The traffic is shown to not exceed the amount of channels, and determining weight values for the traffic channels. Also determining a max number of bits of the channel output Holma disclose performing a transport format combination set and controlling power for packet services. Paneth disclose show a linear prediction filter or estimating power coefficient for each channel. However the prior art of record fails to disclose or fairly suggest the variables of the downlink transmit power, predicted/estimate value, and power value as disclose by the applicant.
